DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 5, 2008 has been entered.

2. In the remarks filed on August 5, 2008, Applicant amended claims 3, 9, 10, 16, 18, and 19, cancelled claims 1, 2, 8, 14, 15 and 17, and submitted arguments for allowability of pending claims 3, 9, 10, 16, 18, and 19.

Response to Arguments

3. Applicant's arguments, filed August 5, 2008, with respect to claims 3, 9, 10, 16, 18, and 19 have been fully considered and are persuasive. The 35 U.S.C. 112 second paragraph rejections of claims 3, 9, and 10 have been withdrawn.

Allowable Subject Matter

4. **Claims 3, 9, 10, 16, 18, and 19** are allowed.

5. The following is an examiner's statement of reasons for allowance:

Claims 3, 16, 18, and 19 are allowable for the reasons indicated in the previous Office Action.

Regarding claims 9 and 10, none of the references of record, alone or in combination, suggest or fairly teach the limitations of independent claims 9 and 10 in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to disclose a method of defect management for an optical recording medium having a plurality of temporary defect management areas, the method comprising a step of recording temporary defect management information in the plurality of temporary defect management areas, comprising recording, in a first temporary defect management area, first temporary defect management information generated when recording to the recording medium, and recording, in a second temporary defect management area, second temporary defect management information generated in response to an eject signal, wherein the first and second temporary defect management areas are separately located in the recording medium, wherein the step of recording temporary defect management information includes recording disc definition structure information including a counter having a value that is updated for each recording of the disc definition structure information, **the step of recording disc definition structure information including recording disc definition structure information of a recording session in the second temporary defect management area, the method further comprising a step of performing defect management immediately following or immediately preceding the recording of the disc definition structure information of the recording session in the second temporary defect management area if a highest counter value recorded in the second temporary defect**

management area is less than a highest counter value recorded in the first temporary defect management area.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
